~~SECRET~~ NOFORN-SKEET CHANNELS ONLYPROJECT SUN STREAK (U)WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

## Session Procedures Report (S/NF/SK)

PROJECT NUMBER: 8711

SESSION NUMBER: 4

DATE OF SESSION: 6 AUG 87

TARGET COUNTRY: IRAN

REFERENCE:

MISSION STATUS:

TECHNIQUE UTILIZED: CRV

SOURCE IDENTIFIER: 018

(S/NF/SK) Monitor Tasking: Using encrypted coordinates (provided),  
[REDACTED]  
during the following windows: August, September, October, November, and  
December 1987.

SG1A

2. (S/NF/SK) Source Tasking: Search the same time line as in previous  
sessions, but label the search [REDACTED]

SG1A

3. (S/NF/SK) Summary: Source summary attached. One missile firing  
detected in September; hits a metallic, box-shaped structure on land.  
At another point on the time line (November 87), a violent attack on  
what appears to be a small village is detected.

4. (S/NF/SK) Comments: Monitor worked hard to get viewer to say that  
the September "target" was on the water, vs land. Also, it is  
interesting that tracing the "reason" for the perceived November  
incident led to a "large, black object"--the Kaaba stone/Mecca?

## memorandum

DATE: 7 August, 1987

REPLY TO  
ATTN OF: DT-S

SUBJECT: SESSION SUMMARY, PROJECT 8711 (C-SS)

SG1J TO: DT-S (ATTN: [REDACTED])

## 1. (S-SS) Statistics:

Project #:	8711
Viewer:	018
Session date:	06 AUG 87
Filename:	8711.L04

## 2. (S-SS) Impressions gained from the session include:

a. A time-line for the next 5 months (August thru December, 1987, showed 2 noticeable points of interest. They are:

AUG	SEP	OCT	NOV	DEC
	1		2	

- 1) Point #1 occurs at a location which, for all appearances, is located amid rolling sand dunes. However, the appearance of the land is repeatedly perceived as being very green. A distant perception of it shows what seems to be the "patchwork quilt" of farmland. The event associated with this place is perceived as a missile firing, but this was a given in the tasking, so is to be expected.

The target site for this missile is perceived as being some sort of large structure, grey in color, and made of metal. Closely looking at the missile's target, however, gives the repeated perception that it is not a ship, but is located on land. There are two accompanying perceptions when viewing the inside of the target: one is that of a man in a dark grey, square, metallic room. The other is of a gaping hole in the side of the metallic structure, with "things" stacked inside which look (AOL: like large bags of flour).

- 2) Point #2 is perceived as occurring during the last ~~part~~ of November. It is a time charged with intense amounts of energy, resulting in great destruction, pain, terror, and confusion. There was a sudden "package" of impressions which conveyed the sense of a small, desert town getting destroyed. The prompt "why?" led to an immediate series of AOL/signal impressions:

OPTIONAL FORM NO. 10  
(REV. 1-80)  
GSA FPMR (41 CFR) 101-11.6

~~SECRET~~

~~SECRET~~

- a) a black symbol within a circle, all on a military green background;
  - b) Omar Sharif
  - c) a stylized falcon
  - d) Picasso's painting of Guernica was also seen as being directly relevant to the destroyed town.
2. Viewer's critique: A post-session review of this session's time-line and the time-line from the previous session showed a direct correlation of the information perceived. I feel very good about this session's material, and feel that it is accurate.
